Modern Equipped Kitchen on Wheels Visits Crossfield

Marvellously Compact Vehicle Is Completely Equipped With Modern Kitchen Apparatus

One is apt to find a kitchen almost anywhere these days since this household unit has become such an important part in the modern scheme of things. Crossfield people witnessed the most up-to-date kitchen of the year on Thursday, July 9th. The famous General Electric Travelling Kitchen was on display from 9:30 until 3:30, giving the women of Crossfield an opportunity to view the latest in modern planned kitchens.

It is difficult to imagine that such a complete working unit can be encompassed within the limits of a car trailer. Yet this motor kitchen, the largest of its type ever built, has a complete working kitchen planned as a good housewife would plan her own to save steps and labour. With an over-all measurement of twenty by eight feet, it offers everything from kitchen range to electric ventilator and laundry equipment.

The trailer is built almost like a small bungalow on wheels. Painted an immaculate white, with green shutters, cottage type windows and inviting doors, it might be a real home. When the unit is parked the doors open wide and enable hundreds of people to pass through and view the well planned layout and fascinating equipment.

Green walls, buff ceiling and green cupboards, which open up to show a bright glimpse of an orange interior, set off the smart curtains which drape the windows. The windows are placed so that their indirect light is used to the utmost advantage. Monel Metal working surfaces give a trim and modern appearance and promise the maximum results with a minimum of labour.

The lighting of all interior treatment is modern and fits in perfectly with the new Hotpoint ranges and other General Electric equipment. The whole kitchen is designed as a labour and step-saving unit.

Through the aid and enterprise of the local G.E. dealers, the Bannister Electric, this exhibit was made possible.

Leaving Crossfield at 3:30 p.m. the Kitchen was next scheduled to appear at Didsbury.

Harley Walsh Takes Canadian Championship Twice

For the second year in succession Harley Walsh, of Madden, was crowned Canadian Champion Bucking Horse rider at the Calgary Stampede.

With this honour goes the Prince of Wales trophy and a purse of \$300.00.

Congratulations Harley. In the North-American Event, Earle Thode, of Casa Grande, Arizona, took first place.

The Linder Brothers of Cardston-Alberta, were well to the fore taking home with them 6 firsts, 1 second and 1 third.

All in all, the Calgary Stampede was highly successful and attracted a goodly crowd.

LOCAL SOCCER

Madden Triumphs Over Didsbury

Winners by a score of 4 goals to 1, Madden defeated Didsbury last Sunday, July 12th, in their first league game.

The game was much closer than the score would indicate. In the first half Madden played with the wind and at half time lead by 2 goals to 1.

Against the wind Madden showed better combination and outplayed the Didsbury lads.

Goal scorers for Madden were Alec Hunter, 2; Reg. Sharp and J. Cameron.

On July 19th, Sunday next, the Madden lads tackle Bowden in another league fixture. Come out and see a real game.

Annual Field Day

Tentative plans are being made for the annual Field Day to be held by the local Board of Trade sometime this month.

To date the day has been set for July 29th, and Messrs. Howard Wright and Frank Laut are making contacts with various officials to be on hand.

This should be another successful day and it is hoped that a large turn out will be present for this special outing.

Make plans now and let nothing else interfere with your being there on July 29th. Further details will be given out weekly in these columns. So consult the "Chronicle," your paper.

Canadian Championship A.A.U. of C.

For the first time in history the youth of Alberta are given the opportunity of competing for Canadian Championship honours within this Province, the National Junior Track and Field Championships of the A.A.U. of C. being scheduled to take place in Wetaskiwin on August 11 and 12, under sanction granted to Alberta Branch A.A.U. of C. and to be conducted by the Wetaskiwin Amateur Athletic Association. Competition is open to boys under 19 years of age on date of the Meet.

At the same time and place the Provincial Track and Field Championships of the Women's Amateur Athletic Federation of Canada (Alberta Branch) will be staged, senior, intermediate and junior divisions. Another feature of the two-day sports fest will be several Highland Dancing competitions for Boys and Girls under 16 and under 13 years of age. For information or Entry Forms apply to K. H. Orr, Secretary, or B. W. Bellamy, Director, Wetaskiwin Amateur Athletic Association. Entries close on July 25.

The way to accomplish a lot of work is to keep at it.

Flash!

At the last minute we learn that the Annual Field Day has been definitely put-off for this year.

"What is a dent?"
"A dent is an inverted bulge."

Here he is!

MEET "LITTLE JOE"

(youngest of the DELCO LIGHT family)

He weighs 40 pounds all dressed-up ready to go. His Dad, Delco Light, says, "He's going places. BELIEVE IT OR NOT! Runs 16 to 18 hours on 1 gallon of gasoline"

Come in and get acquainted with this friendly young fellow.

The Canada Year Book 1936

The publication of the 1936 edition of the Canada Year Book is announced by the General Statistics Branch of the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education, etc. - in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1936 Canada Year Book extends to over 1,150 pages, dealing with every phase of the national life and more especially with those susceptible of statistical measurement. Attention may be called to some of the special features of the present volume. The statistical summary, included in the introductory matter, has been extended this year. A special article, "Canada on Vimy Ridge," prepared by Colonel A. Fortesque Duguid, D.S.O., B.Sc., R.C.A., Director of the Historical Section (G.S.), Department of National Defence, has been included in Chapter II. This is apropos in the light of the pilgrimage to Vimy and the official unveiling of the Vimy Memorial arranged to take place this month. New material on fertility rates and multiple births in Canada has been added to Chapter V. Statistics covering the construction industry in Canada have been made available in the Bureau recently, and are published for the first time in Chapter XV, amplifying the information on contracts awarded and building permits, statistics of which have appeared regularly in the past. Chapter XXVI has been revised; sections dealing with the public health activities of Dominion and of provincial health authorities and a brief sketch of the origin and growth of the different classes of institutions in Canada have been included.

The death of His Majesty King George V on January 20, 1936, received with deep sorrow throughout the Empire and with worldwide regret, and the succession of King Edward VIII to the Throne, have been appropriately marked by the reproduction, as frontispiece, of the official Proclamation of the Government of Canada made on January 21, 1936, accompanied by the latest official photographs obtained through the courtesy of the respective Court photographers.

The Volume is illustrated by many maps and diagrams and the latest available data are everywhere included.

Owing to the urgent need for economy in the distribution of Government publications, it has become necessary to make a charge to all individuals receiving the Canada Year Book. Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of \$1.50, which covers merely the cost of paper, printing and binding. By a special concession, ministers of religion, bona-fide students and school teachers may obtain paper-bound copies at the nominal price of 50c each.

Tourist Trade Revenue

It would appear that provincial governments of the prairie provinces which neglect to spend sufficient money to maintain their highways in good condition are overlooking a good bet, if figures of tourist traffic from the other side of the international boundary into Canada are an index of what might be expected if highways were made attractive enough to draw the quota of this windfall which the western provinces might reasonably expect.

Recently published figures show that tourists entering Canada in 1935, most of them from the United States, were responsible for a total expenditure of \$202,314,000 in this country during their stay here, if an estimate published by the Dominion department of trade and commerce can be accepted as reasonably accurate.

This is an enormous revenue from such a source when it is remembered that the principal export industry of this agricultural country totalled in value \$156,153,857 in the same year, this being the value placed on Canadian exports of wheat and wheat flour for 1935 by the External Trade branch of the Dominion bureau of statistics.

Thus the tourist trade to Canada in 1935 was worth approximately \$16,000,000 more to the country than the principal export agricultural commodity and, when it is pointed out that a substantial proportion of tourist expenditure means clear profit, the value of the traffic in comparison is greater than even appears on the surface.

But when one examines the comparative figures of income from tourist traffic by provinces it is immediately apparent that the share derived by the prairie provinces of this new source of wealth is but a drop in the bucket compared with the income enjoyed by some of the eastern provinces and British Columbia from the same source.

For example, figures compiled by the Saskatchewan Motor Club show that on an average expenditure basis, varied according to length of time of their visit, American tourists entering the province direct through ports of entry on the contiguous section of the international boundary line spent approximately \$222,024 in Saskatchewan in 1935, to which is added another \$652,670 as the estimated expenditure of those who entered the country through Manitoba and Alberta ports and spent a portion of their time in Saskatchewan, making a total of \$1,474,714 as Saskatchewan's share of this new industry—if it may be called such—last year.

In other words all that Saskatchewan derived from this source of new wealth was less than one per cent. of the Dominion's total income from tourist traffic. Without going into further detailed figures it may be said that the tourist revenues accruing to Alberta and Manitoba for the same period were relatively commensurate.

There are certain factors responsible for British Columbia and some of the eastern provinces, and particularly Ontario and Quebec, securing the great bulk of this new source of wealth. One of these is the fact that these provinces are relatively closer to the large American centres of population. This is the principal reason. Another is the greater proportion of paved roads on the Canadian side in these provinces directly linked with similar highways in the United States.

But even after allowing for the greater advantages enjoyed by those provinces mentioned, the fact still remains that the prairie provinces are not getting anything like their proper share of tourist traffic and that for them there are great potentialities yet undeveloped.

The relative scarcity of American tourists in the prairie provinces is partly a heritage of the comparatively recent days when visitors found it a frequent experience to have their cars bogged down in mud. Highways have been materially improved since that time but the stigma earned by prairie roads in those days has by no means been lived down yet. This coupled with the difficulty of financing maintenance of a great mileage of gravelled highways during the still more recent depression years has had the effect of keeping away from the prairie provinces a good many who would have come, but for the skepticism grounded on former experiences.

This is a handicap which has to be overcome before the three western provinces can expect to share in full measure the dividends of tourist traffic to which their natural advantages and beauties entitle them. This can only be done by taking the necessary steps to see that the network of highways already built is maintained in good condition and that as far as possible the dust nuisance of the gravelled highways is eliminated or at least mitigated to a minimum coupled with judicious advertising.

Has Modernized Turkey

People Owe Great Debt To President Of Republic

Mustapha Kemal Fasha, President of the Turkish Republic since 1923, has had eight attempts on his life in 15 years. He pays a servant \$3,000 a year for working 30 minutes a day to taste his food before he eats it—in case of its being poisoned. Mustapha Kemal—known as "Grey Wolf"—has made Turkey a modern State. The Turkish army discarded the fez at his command, and he has altered women's veils, the Turkish calendar, and has thrown over dervishes. He has separated Church and State, established art schools where students work from living models. In Ankara, the capital, there are seven monuments of him. Mustapha Kemal is fond of dancing and gay company. He encourages the young folk in enjoying themselves. He is 56 years of age, the son of a minor official, and was educated at the Military College, Turkey.

Belong To Fine Arts

Softball and bridge have been elevated to the "fine arts" by Vancouver's public library. The library's latest report lists a book of official rules of softball and a book on bridge under the fine arts section, along with such intricate hobbies as hand-loom weaving and metalcraft.

Musical instruments used by the Chinese are drums, cymbals, horns, lutes, castanets and flutes. There are three varieties of bells—po-chung, te-chung and pien-chung.

A New Fire Extinguisher

Bomb That Puts Out Blaze Demonstrated In France

There has recently been demonstrated in France by its three inventors, Signor Redelli and Signor Finat of Italy and Herr Puschner of Austria, a bomb that kills fire. The demonstration was arranged in collaboration with the Strasbourg Fire Brigade, which built some stage scenery houses and set them alight. They also lighted petrol and rubber. The new bombs killed all these fires, and aroused great enthusiasm.

The principle of the new bomb is like blowing out a candle on a vast scale; the force of the explosion put out the fire. The chemical substance they contain is quite harmless. It possesses the property of cooling the material it touches, and so prevents the debris from smouldering afterwards. The effect of these bombs on blazing petrol in the open air was amazing.

New Grain-Testing Station

An experimental sub-station is to be established north of Davidson in Central Saskatchewan. There are already 25 of these stations in the province for the testing of grain and grasses under different methods of cultivation.

The tons of beeswax used in automobile manufacturing require the labors of 93,000,000 bees.

People of Germany are drinking more sparkling wine than before the World War.

Toc H Movement

Celebrated Its Coming Of Age At Ceremonies In London

Toc H, a movement which began in a dugout in Poperinghe, on the Ypres road, in 1915, celebrated on Sunday, June 28, its coming-of-age in the Crystal Palace, London.

In an address at the ceremony of "lighting of lamps," the Duke of Kent traced the development of the movement through the empire from its humble beginning to the present stage, remarking that Canada now has 38 Toc H units and two houses, South Africa 87 units and one house, and Australia 140 units and one house.

He read a message from the king conveying his sincere greetings and congratulations and recalling that from the earliest years of the movement he had presided practically every year at the lighting of the lamps of maintenance.

(The objects of the Toc H movement are to "perpetuate the lessons of cheerful self-sacrifice and mutual help, without barriers of class or creed, taught by the young men who laid down their lives during the Great War.") The symbolism of the lamp represents the keeping alive of "the ideals which they embodied".

Referring to the recent visit of "Tubby" Clayton—Rev. P. B. Clayton, founder of the movement—to the eastern Mediterranean, the duke said it had stimulated Toc H in that part of the world, where many of its members are drawn, from the army, navy and air force.

British Broadcasting

Government Extends Charter Of The B.B.C. For Ten Years

Following the recommendations of a special committee on broadcasting, it was announced in London that the government would extend the charter of the British Broadcasting Corporation for 10 years from Dec. 31 next, increase the number of governors from seven to 10 and increase the corporation's share of revenue from public receiving licences to 20 per cent. Cost of such licences will remain at 10 shillings.

The government held the view the corporation should continue to refrain from commenting upon current affairs, both in broadcasts and in the corporation's own publications.

It approved the suggestion of the committee—which submitted its report last March—that empire broadcasting service should be developed. It also held that the licensing of relay stations should be continued for another three years, the postmaster-general being empowered to take over the relays afterward.

The government also approved the continued exclusion of advertisements and believed the respective departments should take all possible steps to prevent the broadcasting of foreign advertisement programs.

However, the government rejected the proposal of the broadcasting committee, which was headed by Lord Illiswater, that the cultural side of broadcasting should be transferred to a cabinet minister.

Belgian Defense Project

Plan Erection Of Network Of Machine Gun Nests Along Border

A plan for a series of machine gun nests along the Belgian frontier and extension of the term of Belgium's obligatory military service from eight to 18 months were contained in proposals submitted to the military committee of the Belgian chamber by General Maglaine, former chief of the general staff and author of the Maglaine plan of national defence.

The defence project, which has been approved by the superior defence council, calls for erection of a network of small machine gun nests. They would be manned by trained mobile troops and would be reinforced by a "destruction system" under the Maglaine plan. The system of destruction would consist of mining bridges, roads and railways throughout the border regions to delay the advance of any invading troops.

In advocating the increase in the term of obligatory service, Gen. Maglaine said the measure would provide the nation with a sufficient number of trained troops to carry out his defence plan.

The pirarucu, a fresh water fish, is found only in the Amazon river and its tributaries. Resembling a whale, it often weighs as much as 200 pounds.

The famous mineral springs of Bath, England, produce 500,000 gallons of medicated water daily.

Violent Deaths

Automobile Accidents, Suicides And Other Mishaps Take Heavy Toll

Automobile and other accidents, suicides and homicides brought death to 8,885 people in Canada last year, the Dominion Bureau of Statistics reported. Almost all forms of violent death except suicide showed increases over 1934 and crept up toward record high levels registered around 1930 and 1931.

Automobile mishaps took 1,274 lives or 11.2 per 100,000 of population compared with 1,115 in 1934. This was the largest toll since 1931 when 1,316 fatalities occurred.

In all, 6,885 persons or 62.9 per 100,000 met death from external violence in 1935. This, too, was the highest total since 1931 and compared with 6,469 in 1934.

Suicides accounted for 902 deaths, compared to 927 in 1934 and homicides for 153 compared with 142 in 1934.

All provinces with the exception of Prince Edward Island, New Brunswick, and Alberta showed a larger number of motor vehicle fatalities in 1935 than in the preceding year. Prince Edward Island, however, had two deaths as compared with five, New Brunswick 40 against 52, and Alberta 45 against 61.

Prince Edward Island had the lowest rate, 2.2 per 100,000 and Saskatchewan stood next with a rate of 4.1.

SELECTED RECIPES

MARSHMALLOW CHOCOLATE LOAF CAKE

3 squares unsweetened chocolate
1 cup cold milk
2 cups flour
2 teaspoon Magic Baking Powder
1/2 teaspoon salt
1/2 cup butter
1 1/2 cups sugar
8 eggs (yolks only)
1 teaspoon vanilla

In a double boiler put chocolate and milk, when melted stir until quite smooth—cool. Sift flour once, measure, add baking powder and salt, sift together three times. Cream butter, gradually add sugar and beat until light and fluffy. Add yolks which have been beaten until thick and lemon colored, and vanilla, then add flour mixture alternately with the cooled chocolate, a little at a time, beating well after each addition until smooth. Bake in a well greased pan in slow oven (235 degrees F.) for 25 minutes, increase heat slightly (to 350 degrees F.) and finish baking 45 minutes. Turn out carefully and while still warm cover bottom with marshmallows that have been rinsed off with cold water and cut in halves cross-wise. When cake is cool cover with chocolate frosting.

Invisible Light

Will Be Given By Lamps In Near Future Is Prediction

In the near future lamps will give "invisible" light. This forecast has been made by T. N. Waite, general manager of the Hull (England) Corporation Electrical Department. "Lamps will be able to give out not only visible light, but what we call 'invisible light,'" he said. "Scientists are still striving for increased beauty as well as increased efficiency."

India Has Odd Bridge

A bridge across the Jhelum River in Kashmir is made of wickerwork. It consists of three ropes made of hazel twigs, one to walk on and the others to hold, the ropes being kept in position by V-shaped branches every six feet. Although appearing frail and swinging about in a gale, the bridge is really very strong.

A dwarf in Zululand is 14 years old, but is only 20 inches tall and has not grown for years.

Popping the Question!

Why don't you, too, get back to Ogden's Fine Cut? Times are better, and Ogden's is a better tobacco—the "one and only" choice of smokers who know that cigarettes rolled with Ogden's are the next best to "tailor-made". Get yourself a package today—it's Cellophane-wrapped and has the purple easy-opening device. And make sure you use the best cigarette papers—"Chantecler" or "Vogue".

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug

Lives In Lonely District

Woman Has Gold-Trading Post In British Guiana

A young woman arrived in Boston aboard the Canadian National Steamship liner Lady Nelson and told of conducting alone for four years a gold-trading post in the wilds of British Guiana.

Mrs. Violet McTurk, who has lived in British Guiana since she married "Mick" McTurk, gold and diamond trader, told reporters how she continued her husband's business after he lost his life in an accident four years ago.

"The natives agreed to trade with me, after they pinched me and decided I was all right. They had never seen a white woman until 'Mick' took me back to the post, 200 miles inland from Demerara."

"When Mick died I just went right on with the business. Tourists reach the post quite often, to see Kaie Teer Falls, which is, they tell me, five times larger than your Niagara Falls."

Mrs. McTurk said she had operated a river boat, acted as a guide for tourists, and the rest of the time conducted her store at the post, where, she said, she sold everything from rum to ammunition. On this, her first visit to this country, she said she would visit Boston and New York. She was born in Barbados.

The Shetland Islands

Only 27 Out Of 100 In Group Are Inhabited

The Shetland group consists of 100 islands, 27 of which are inhabited. The largest are: Mainland, Yell, Unst, Fetlar, Breasay and Whalsay. The islands seldom rise to more than 500 feet above sea level. Much of the soil is peaty, and barely one-sixth is under cultivation. Cats and sheep are grazed and the small, sturdy Shetland ponies and Shetland wool are well known. Fishing is one of the chief occupations and the whale industry is of importance. Originally settled by Norsemen, the island remained under Norse rule until the marriage of James III. of Scotland to Margaret, princess of Norway.

Utah's Great Salt Lake

Because there's so much salt in Utah's Great Salt Lake, you can't sink or even submerge yourself in it. But it's still possible for an inexperienced swimmer to drown in the lake by going beyond his depth, losing his balance and being suffocated by the brine. But even then his body would float on the surface.

Statistics reveal that for every three men aged between 75 and 80, there are four women. For every four men more than 85, there are seven women.

HEAVY WAXED PAPER

Warehouses at Calgary, Edmonton, Regina and Winnipeg

UNTIL HE SEES FIT, BALDWIN WILL NOT RETIRE

London.—Prime Minister Baldwin told a Conservative party gathering he is not ill, and will "retire when I think fit."

"But it is for me to decide," he said, "and for no one to dictate to me."

He had gone to Chequers, his country residence, recently for a short rest, the prime minister said, because "I was feeling rather tired and not sleeping too well."

"I have learned much from my short holiday at Chequers," he went on. "I have heard there is a procession of doctors between London and Chequers and that the telephone wires were fusing with requests for me to return to London, and that I was breaking up and my resignation was imminent."

"There is not a word of truth in those statements."

"There have been no doctors at Chequers. The telephone wires were not broken up and my resignation was not imminent."

"We will all retire some day. I'll retire when I think fit."

Reiterating that sanctions could not work without the participation of the United States, Japan and Germany as members of the League of Nations and that Great Britain was justified in abandoning sanctions because their continued application would mean war, he said:

"War is a very terrible thing, and when once let loose in Europe no man can tell how far it will spread and no man can tell when and how it will stop."

"I am quite content under the circumstances to be called a coward if I have done what I could in regard to the views of every country in Europe to keep my people out of war."

He said Britain's joining the "mad folly of Europe's" rearmament was justified on the grounds of the imposition of sanctions and in the carrying out of any future obligations under the league covenant. In addition the nation needed a guard against "national rivalries which are becoming greater and greater."

He professed to see hope that "sooner or later it may be possible once again to discuss reduction in armaments," bringing relief from tremendous expenditures, "which if protracted too long may ruin us all."

Zeppelin Changed Course

Came Via Montreal As Weather Conditions More Favorable

Montreal.—The German Zeppelin Hindenburg departed from her usual course on her trans-atlantic flight last week and flew up the St. Lawrence river valley to Montreal before turning southward towards her base at Lakehurst, N.J.

The dirigible's commander wirelessly told the newspaper: "We landed while over this city that the big ship came via Montreal because better conditions were more favorable than over the Atlantic coast."

The Hindenburg was later sighted over Plattsburg, N.Y., 20 miles south of the international border.

Merely To Talk Business

Finance Minister Arrives In London For Trade Talks

London.—Finance Minister Charles Dunning arrived here from Canada. The purpose of his visit was merely to talk business with "Canada's best customer," he declared.

Mr. Dunning was met by Rear-Admiral Arthur Bromley, reception secretary of the Dominion office, and Lieutenant-Colonel G. P. Vanier, representing the Canadian high commissioner, Hon. Vincent Massey.

Mr. Dunning said he hoped to visit his native Leicestershire if he had time. He was born at Croft in that county.

Bank Deposits Down

Ottawa.—Deposits by the Dominion government with the Bank of Canada during the week ended June 30 showed a decrease of \$679,128 compared with the previous week according to the weekly statement issued by the bank. At the same time deposits by chartered banks were down \$1,041,249.

Again Takes Up Law

Quebec.—Free from the cares of political life, former Premier Taschereau has resumed the legal practice he relinquished 16 years ago. Every morning since he resigned the premiership he has gone to his office where he began practicing law nearly 60 years ago.

Rate Has Been Reduced

Marine Insurance On Hudson Bay Route To Be Lower

Ottawa.—Reductions in marine insurance rates and a lengthening of the insurable navigation season on the Hudson Bay route have been announced by R. K. Smith, deputy minister of marine, coincident with a similar announcement in London. Insurance rates on vessels equipped with gyro compass are reduced from 22s 6d per cent. (or per 1100) on insured value to 17s 6d per cent. The change, Mr. Smith said, would mean the "cost of insurance will be substantially reduced."

The navigation season for minimum insurance rates is being extended by eight days, opening five days earlier and closing at the same time as last year. The date for imposition of surcharges for late departures from Churchill, however, has been set back three days, making an effective eight-day extension. Last May, Hon. C. D. Howe, minister of marine, forecast the announcement in a statement to the House of Commons. He then worked out an estimate of the effect of the rate reduction and said a vessel of 5,000 tons equipped with gyro compass and valued at \$50,000 would pay \$525 for insurance against all risks on a Bay route this year whereas last year the same charge would have aggregated \$937.

World Wheat Surplus

Smallest In Nine Years Is Estimate Of U.S. Bureau

Washington.—The world wheat surplus was estimated by the United States bureau of agricultural economics at 388,000,000 bushels—the smallest in nine years.

This surplus as of July 1 in Argentina, Australia, Canada and the United States, the principal exporting nations, compared with 532,000,000 bushels a year ago, 741,000,000 in 1934 and 788,000,000—an all time peak—in the summer of 1933.

The bureau added the world carry-over also would be the smallest in nine years, a total of 65,000,000 bushels as of July 1 compared with 856,000,000 a year ago and 1,109,000,000 two years ago.

The United States carry-over was reported at 125,000,000 bushels, the smallest since July 1, 1928. This compared with 152,000,000 in 1935, 286,000,000 in 1934 and 393,000,000 on July 1, 1933 which was an all-time high.

Celebration In London

Earl Of Willington Guest Of Honor At Canada Day Dinner

London.—"Canada Day" celebrations in London included a reception given by Mrs. Vincent Massey, wife of the Canadian high commissioner, which was attended by 3,000 guests, and a dinner at the Carlton hotel. The evening at which the Earl of Willington, governor-general from 1926 to 1931, was the guest of honor.

In a speech at the dinner, which was presided over by Lord Green-wich, who is a native of Whitby, Ont., Lord Willington described the five years he had spent at Ottawa as the happiest in his life.

Canada, he said, had passed through a grievous time but had weathered the storm magnificently.

Retired On Pension

Veteran R.C.M.P. Officer Has Served Twenty-Three Years

Prince Albert, Sask.—Concluding 23 years service as a member of Canada's famous police force, Detective-Sergeant James S. Wood, in charge of the criminal investigation branch of the R.C.M.P. Prince Albert sub-division has retired on pension from the force and on July 1 left with his family for Vancouver Island where they will make their future home.

Sergeant Wood has had a remarkably active career during the 43 years of his life, the last 23 being tacked with colorful episodes in connection with the duties of his office and his service overseas.

Unreported For Twelve Days

Ship Of Sir Hubert Wilkins Finally Gives Position

Oso, Norway.—The Norwegian liner Stavangerford reported to Oslo receipt of a message from the Wyatt Earp exploration motor ship of Sir Hubert Wilkins, which has been unreported for 12 days.

The Wyatt Earp gave its position as 46 degrees north latitude and 40 degrees west longitude, the master of the liner reported.

Sir Hubert told the master he had been delayed but hoped to reach Norway, his destination, about mid-July.

POWERS RALLY TO THE SUPPORT OF THE LEAGUE

Geneva.—Three of the world's largest powers rallied to the support of the League of Nations in the face of veiled hints of smaller powers at withdrawal.

The three were Great Britain, France and Soviet Russia. Spokesmen for the first two said their governments would not recognize Italy's annexation of Ethiopia and all voiced continued faith in the league's future.

Delegates from Canada and South Africa presented opposite views with respect to continuation of sanctions against Italy.

Speaking for Canada, Hon. Vincent Massey, high commissioner to London, said there would appear to be no practical alternative for Canada but to support discontinuance of sanctions.

In the view of the Canadian government "the continuance of ineffective economic pressure which would not secure the original objective, would be worse than useless."

It had been urged members of the league should definitely undertake whatever compulsion might be necessary, but it seemed clear there was no appreciable number of effective members who would be prepared to embark on such a course while there was uncertainty as to whether the objective might not be lost sight of in "very serious disturbances that might arise."

Charles T. Water, high commissioner for South Africa, declared 50 nations led by three of the most powerful in the world were about to declare their powerlessness to protect the weakest in their midst.

"The authority of the league about to come to naught, my government desires me to say here this renunciation by the most powerful members of the league of their collective decision can alone be interpreted as a surrender by them of authority of the league—not because of impotence to safeguard that authority but as a fatal denial of their ability to bear the sacrifice necessary for fulfillment of their obligations."

Eight Italian newspapers, arrested for "creating a scandal" by heckling and cursing Emperor Haile Selassie when he addressed the assembly, were released from jail and immediately expelled from Switzerland.

(Italy, standing behind the newspapers, ordered its minister to Switzerland to protest the arrests. The action of the eight was hailed in Italy as a gesture of patriotism.)

Emperor Haile Selassie, defeated emperor of Ethiopia, went before them to plead his cause against victorious Italy.

Heenan Highway Opened

Fort Frances, Ont.—The new 146-mile stretch of highway linking Fort Frances and Kenora formally was opened to traffic July 1 by Premier Mitchell Hepburn of Ontario who immediately christened the road "Heenan highway."

RETIREES

Sir William Mulock, Chief Justice of Ontario, who, at the age of 62 years, has retired from public life.

May Visit Canada

President Roosevelt Hopeful Of Visiting Governor-General

Washington.—President Roosevelt may yet accept the invitation of the governor-general to visit him in Canada this summer.

Soon after Lord Tweedsmuir extended the invitation last April, asking Mr. Roosevelt to be his guest at Rideau hall in Ottawa, it was said here pre-election engagements would make such a presidential trip impossible.

However, Mr. Roosevelt said at a press conference he still was hopeful of visiting the governor-general at Quebec in August. The vice-regal summer residence is at the citadel in the ancient capital.

The present presidential schedule calls for Mr. Roosevelt to board the schooner Seawann near Portland, Maine, around July 14 for a two-week cruise. It is expected he will visit the Roosevelt summer home on Campobello island, in New Brunswick waters, and a stop in Nova Scotia is said to be under contemplation.

If the trip to Quebec is decided upon, it is believed the president would go there by train from the Maritime.

Fast Torpedo Boat

King Edward Travels 60 Miles Per Hour In New Warcraft

Portsmouth, England.—The king, paying his first visit to the navy since his accession, spent half an hour aboard a torpedo motorboat capable of 60 miles an hour.

After inspecting the shore establishments at Portsmouth, the king boarded the new type of boat. The boat headed out across the harbor. As it increased in speed, great waves broke over it. The stern was so low in the water it appeared to be submerged.

Experts believe that these torpedo motorboats, of which 13 cost less than one destroyer, may prove the navy's answer to the air menace. Their high speed and small dimensions make it almost impossible to hit them with a bomb. Each boat has two torpedoes, depth charges and a number of machine guns. Each has quarters for a crew of five.

"FROM SEA TO SEA"

A relay of engines which pulled the Canadian Pacific Railway's fifth anniversary transcontinental train, left Montreal June 28th and arrived in Vancouver July 2nd. It carried the decorative adaptation of the Dominion Coat of Arms, shown above, on the huge 2800 locomotives. In the plate at the top appear the words "From Sea to Sea" and the figures "1886-1936". Red and white hunting covered the top of the cow-catcher and sides of the engine.

Confesses To Theft Charges

Lawyer From Searford, Ontario, Surrenders To California Police

Los Angeles.—John Joseph Huggard, Searford, Ont., lawyer wanted on theft charges, has signed waiver of extradition and a confession, Detective Captain Jack Trainer said.

Huggard, who has been in Los Angeles one week living in a small hotel at Sixth and Hope streets, said the principal motive for his walking into the police station and confessing was "to pay the penalty for my offense" and because he was destitute.

Huggard said he left Searford April 29 to 30, remained in New York a month, then went to Buffalo, stopped a night in Chicago and proceeded to Kansas City, Dallas and Los Angeles. He had been here one week.

In the statement taken by police Huggard was quoted as having "embezzled \$30,000 and \$40,000 from a dozen different persons."

WORKS PLAN AS A STIMULUS TO UNEMPLOYMENT

Ottawa.—Labor Minister Rogers announced conclusion of Dominion-provincial agreements under which at least \$30,000,000 will be spent this year "as a direct stimulus to employment." In addition to more than \$400,000,000 voted in supplementary estimates for federal works projects.

The new agreements for joint works on a 50-50 expenditure basis contain a mandatory clause providing at least 50 per cent. of those employed on projects covered by the \$30,000,000 shall be taken from relief rolls.

The minister made a simultaneous announcement that grants-in-aid to provinces for direct relief will be cut 10 per cent. during July, August and September. He said this step had been decided in view of the "improvement in general employment and in anticipation of the reduction of relief rolls through the joint works program."

Mr. Rogers said operation of the mandatory clause in the Dominion-provincial joint works agreements would have the result of "reducing the relief burden of municipalities and would also make it possible to determine the direct effect of public works projects as an aid to the relief situation."

He said projects covered by the agreements will consist largely of highway construction, "which will be developmental in its ultimate effects through the stimulus it will afford to two of the major industries of the country, namely, the mining industry and the tourist trade."

He emphasized provision in the agreements that grants-in-aid shall be subject to quarterly review. "Before the next revision takes place in September," he said, "it is expected that the national employment commission will have carried out a re-regulation of those on relief and that any new readjustment of the form and amounts of grants-in-aid will be based on an analysis of the actual relief situation of the provinces."

"The recent revisions have taken the form of horizontal percentage increases or decreases as applied to grants-in-aid which were in effect when the present government came into office last October."

He explained, meant that the changes might not meet adequately conditions in provinces where the employment situation had shown a retreat, and might be more than adequate for others which had experienced real improvement.

The 10 per cent. reduction in direct relief grants for the three summer months, the minister explained, topped the 15 per cent. reduction announced last April 1. However, he recalled, the grants were increased 75 per cent. last December, so that even with the two subsequent reductions Dominion grants to the provinces still are substantially higher than they were a year ago.

"In provinces where national parks are located," he said, "provision has been made in the new agreements for construction or improvement of main highways leading to the parks from the international boundary. At the same time provision is being made for improvement of other international gateways to Canada in order to facilitate tourist travel."

"Through the department of mines arrangements have been made with several provinces for construction of roads into proved gold mining areas where developments have been retarded by lack of adequate communications. The Dominion government is paying two-thirds of the cost of construction of these roads."

SELASSIE ASKS LEAGUE FOR LOAN TO SAVE COUNTRY

Geneva.—Emperor Haile Selassie took two bold steps in an attempt to save his country from complete domination by Italy.

First he asked the league for a loan of \$50,000,000 to "defend her integrity." Then he sent to the assembly a draft of a resolution calling attention to provisions in articles X, and XVII of the covenant for non-recognition of the annexation obtained by force of arms.

The negus, who delivered a personal appeal to the assembly two days previous, said Ethiopia has a right to assistance from the league under article XVII.

He recommended that league members guarantee the loan, which would be floated by Ethiopia under conditions to be fixed by the council and after consultation with the league financial committee.

Haile Selassie said he had placed before member nations questions to which with few exceptions the powers had not given a clear reply "in the present tragic circumstances."

For the sake of nations "which may be menaced by future aggression," he said, "it is important frankly and loyally, without equivocation, for each nation to take its responsibility by its vote."

The Dutch delegate, Dr. A. C. D. De Graeff, suggested the league be reformed by eliminating sanctions and making the body a purely consultative one.

Austrian spokesman, Stanley M. Bruce, said in discussing the league's failure to save Ethiopia that "the hope of millions of men and women has been extinguished. We must rekindle that hope."

Peace Conference Proposed

Valera Asks World Powers To Convene At Once

Geneva.—Immediate convocation of a conference of great powers to consider the present international situation in Europe was proposed to the League of Nations assembly by Eamon de Valera, president of the Irish Free State.

Referring to what he called the danger of war in Europe, De Valera said a peace conference would have to be held in any event "after Europe once more was drenched in blood." He said such a conference at present would mean "the terrible menace which threatens us can be warded off."

Meanwhile it was reported France was desirous of getting Germany into a new Locarno conference late in July even if Germany fails to reply to the British Locarno questionnaire. Special efforts also will be made, he was understood, to get Italy into the party.

Plans Have Been Approved

Arrangements Made For Welcome Of Canadians To France

Paris.—Plans for welcoming the thousands of Canadians who will visit France on the occasion of the unveiling by King Edward of the Canadian war memorial at Vimy were approved when the welcoming committee met under the chairmanship of Marshal Petain.

Albert Riviere, minister of pensions, outlined the program, which will be elaborated later by the secretary-general of the committee. It provides for public receptions at Paris, Rouen, Blois and Arras.

Had Few Accidents

Ontario's Record For Dominion Day

Toronto.—Despite brilliant summer weather that attracted thousands to highways and beaches, Ontario looked back on a Dominion day unusually free from accidents.

Only two persons were killed, both in car accidents, and except for minor accidents that occurred while the province relaxed at its many playgrounds, the day passed with few mishaps to mar its general joyfulness.

Pays Surprise Visit

London.—The king paid a surprise visit to Portsmouth and inspected a battalion of the Middlesex regiment at the Victoria barracks at Southsea. His Majesty, who reviewed naval units and inspected the new "moquette" fighting craft of the navy in gala ceremonies here, returned by automobile from Chichester, where he is staying with Lord Mountbatten. The troops were drawn up on the parade ground when the king arrived. Royal artillery units fired a salute.

Between Ourselves

Under "Letters to the Editor" Evan Gordon takes the Chronicle to task regarding the absence of any comment on Senior Baseball.

Mr. Gordon's letter is the first intimation we have had that a regular Senior Club has been formed. As we were not officially notified of its existence or invited to be present at the meeting, we cannot see how we have failed in this instance. True, we have noticed a few of the senior boys playing on the Midget Diamond, but we had no idea that they were the nucleus of the Senior team.

In the letter to the Editor, it is hard to discern just whether or not the new team has been formed for the games sake, for the Sportsmanship it should involve, or whether it is for the sake of personal glory.

However, we are glad to learn that Crossfield Seniors are taking sufficient interest in reviving a real Ball Club, and if the game is played for the sake of the game, the Club can set aside any worries as to whether or not it will be supported. Ball fans will rally around never fear.

The Midget games create interest and a crowd is assured them every time they play. If the seniors will follow the example set by the younger boys, their support will not be wanting.

At all times we are willing to receive reports of Athletic and Social Activities, and we would refer our constant readers and others to the little poem, "Let Us Have It" and we mean everything it implies.

Thank You,

LET US HAVE IT
"If you have a bit of news,
Send it in,
Something that will amuse,
Send it in,
A story that is true,
An accident that's new,
We want to hear from you,
Send it in,
"Don't wait a month to do it,
Send it in,
Don't let 'em beat you to it,
Send it in,
Something serious or a jest,
Just which ever you like best,
The editor will do the rest,
Send it in."

Gossip and Grumbles

Helen Sharp looking for a missing chauffeur Saturday night.... P.D. wanting to know if the reception handed out at Atlas Lumber Company's customers is like what the gentleman got in the company's Ad last week. (That's just for transients, P.D.)... Radio Interference

Electrical Equipment
Shortly after the beginning of radio broadcasting the "leaky transformer" was invented as an excuse for all unwanted disturbances in a radio set. This myth has persisted to the present day, although the supply transformers are responsible for only a negligible amount of interference to radio reception. On the other hand, there are many factors in the electrical system which may set up unwanted electrical fields and result in disturbance in the radio set. Power companies have been active throughout the whole period of radio broadcasting in tracing down and eliminating such difficulties. The public generally is aware of this activity and as a result many complaints of radio interference are received which have nothing to do with the power company's own system. The general experience is that about one-sixth of the total number of complaints investigated are traced to disturbances on a power company's system.

It is well known that any electrical spark or discharge may set up radio frequency disturbances. In the household there are certain devices which in their normal operation depend upon a making and a breaking of a circuit for their operation. Other devices may frequently be responsible due to some minor difficulty which goes unnoticed as far as the normal operation is concerned.

House wiring

The electrical wiring inside of a house consists of continuous metallic conductors from the point of supply to the point where the energy is used. These conductors are normally soldered where joined together, and set screws are used for connection to permanent devices. Under such conditions the electric wiring of itself would not set up any radio disturbance. However, a loose screw on a switch or a fixture would be a potential source of interference both in the house and in neighbouring houses. Switches in their normal operation of opening and closing the circuit may result in radio disturbance. These, except in large apartment houses where there are a number of switches being operated at very frequent intervals, have generally not been a source of annoyance.

CFAC Hi-Lites

Morning Symphony

CFAC's afternoon daily, The Music Lover's Corner which has been on the air continuously for more than four years, will have its morning counterpart at ten thirty when the 10:30 Symphony will present a welcome half-hour of the classics. This programme like the Music Lover's Corner, is under the direction of M. V. Chestnut, CFAC programme director, whose knowledge of classical recordings is second to none.

In New York

Jack Norton, staff violinist of CFAC and one of Calgary's outstanding musicians, recently returned to his former Eastern haunts in Toronto and New York, where he will study for some little time, as well as take in many of the big league ball games. Jack's return will likely be governed by the big league playoffs in the Fall.

My Lady

Baked White Fish

Make dressing of bread crumbs, salt, pepper, and sew up in the fish. Bake for one hour, basting with butter. Serve with tomato sauce. Sauce—Two cups of tomatoes, one teaspoonful of chopped onion, two whole cloves, a sprig of parsley, four tablespoonfuls flour, four tablespoonfuls of butter and one tablespoonful of salt and one-half teaspoonful of pepper. Cook the tomatoes, onions, cloves and parsley together for ten minutes mix the butter, flour, salt and pepper until smooth and add the other ingredients which have been strained. Stir until sauce boils.

Eggs a la Goldenrod

One tablespoonful butter
One-half teaspoonful salt
One tablespoonful flour
One-eighth teaspoonful pepper
One cup milk
A little parsley
Three hard cooked eggs.

Melt the butter in a double boiler, blend in flour, add milk gradually and cook over hot water, add seasonings and chopped parsley. Chop the whites of hard boiled eggs and add to sauce. Heat and pour over fingers of toast. Force the yolks of eggs through a sieve over the sauce and garnish with parsley.

School Fair Jottings

By "Seedling"

Seedling Replaces Calf Club Field Day For School Fair Jottings

There is to be a joint picnic for the four Boys and Girls Beef calf Clubs from Crossfield, Simons Valley, Grainger and Olds, at the Olds School of Agriculture on Tuesday July 28th, 1936.

This will be of special interest to all feeders of beef cattle, and every one is hereby invited to attend.

It makes no difference whether you belong to the Calf-club or not, come and show them that you are interested. It is expected that this affair will start about noon and you will be able to take your lunch and find that tea and coffee are provided for you at the school.

Further particulars will be announced in this column next week, so watch your paper.

The Settler and the Lantern

Night's raven wings brood o'er the land,
My time-piece chimes the hour of eight,
Within the snow-clad barn I know
The horses for my coming wait;
So I must go with lantern-light,
Bed-down and feed them for the night.

I take the battered lantern down
From off its peg upon the beam,
To find it coated black with soot
Through which a light would barely gleam;
With rag I wipe the grime away,
That nothing may obscure a ray.

The while I'm wiping off the stains,
I get to wondering if sin,—
If things I ought not to have done.
Do darken thus the Light within,
And wish I could as swiftly clean
Away the faults both dark and mean.

The lantern cannot shed its stains,
And we are handicapped the same,
It was to wipe away our sins
The Master out of Nazareth came;
Tis more to Him to see our Light
Than mine to have the lantern bright.

The hotter the day,
the more refreshing

Enormous Increases In Productivity Of Soil With New Scientific Methods

Dr. O. W. Wilcox has for some years been writing books about the new science of "Agrobiology," which makes possible enormous increases in productivity of the soil through new technical methods. Some of his predictions have been criticized, by Secretary Wallace among other people, as being excessive. Striking confirmation of Dr. Wilcox's general theory now comes from California in the form of a report by Dr. W. F. Gerike, associate plant physiologist of the University of California. Dr. Gerike has been growing tomato plants fifteen feet high and tobacco twenty feet high. He has produced 217 tons of tomatoes per acre and has grown 2,465 bushels of potatoes—against a United States average at present of 116 bushels. Many other vegetables have responded similarly, and striking results have also been achieved with flowers.

Under Dr. Gerike's method, plants are not set into the earth at all. Shallow tanks are filled with a liquid composed of some ten chemicals, all of them readily available in commerce, and this liquid is heated by electricity or otherwise. Over the tanks is spread a wire screen covered with straw, excelsior or moss, in which the seeds are planted, thrusting their roots down into the liquid below. The growth takes place in unheated greenhouses or, in the proper season, out of doors. The products of this process are of high quality, and in the case of tobacco it is possible to avoid the rancidity that sometimes accompanies rapid growth under natural conditions. That this plan is not a toy of the laboratory is shown by the fact that tomatoes produced under Dr. Gerike's method are now being sold on the California market, at normal prices and at a commercial profit.

Forty years ago, H. G. Wells wrote a scientific romance, "The Food of the Gods," in which he predicted a development of this sort, which changed the whole structure of society. He may yet live to see his prediction come true, for possibilities of these new agricultural techniques seem almost boundless. Already we are hearing stories of an occasional scientist who is said to grow a year's supply of potatoes for a large family in a tin pan under the kitchen table. It is possible to envisage all the vegetable foods for a huge New York apartment house being produced in a small space on the roof—unless, indeed, food became so cheap and so easy to produce that everyone moved to the country. There is as a matter of fact no special reason why we should not have skyscraper farms, on which the rows of shallow pans would be stacked one above the other to a height of a hundred—or a thousand—feet, and reached by elevators. What such a development would do to 5,000,000 farm families, and to the millions of other persons who get their livelihood from the present agricultural economy, is a vista as exciting as it is terrifying. Certainly, the California experiments bring us one step nearer to that famous "economy of abundance," and make it still more absurd that millions of people should continue to go hungry.—New Republic.

Taking No Chances

Soviet Doctors Invent Gas-Proof Cradles For Babies
Gas-proof cradles for babies have been invented by a group of Soviet doctors and engineers working at the Moscow Sanitary Chemical Institute. Each cradle consists of a bag equipped with gas filters. The bag completely encloses the child and is joined by a tube to the mask worn by the mother. Her breathing draws purified air into the child's bag as well as her own mask.

Bird Builds Wire Nest

A resident of Alas Craig, Ontario, while trimming a hedge on his property, overturned a bird's nest which had been built in the top of the hedge. The nest was constructed entirely of fine quality silk covered wire and was perfect in shape. The size measured a trifle over three inches in width and was of the same depth. The ends of the wire were neatly and firmly coiled about some stout twig.

"You" was formerly the second person plural, and was used with the plural verb in addressing a king. It corresponded to the kindly we. It is called a plural of courtesy, but now is in common use.

British Farmers Protest

Asking For Relief From Tithes Collected Under Queen Anne's Bounty

Farmers seeking relief from church tithes laid new demands before the British cabinet. Over a three-mile course, a procession of 5,000 farmers wound through London streets tying up traffic and creating confusion during the rush hour. The protesters carried banners directed against "Queen Anne's Bounty," the royalties which were diverted from the crown to the Church of England in 1704.

"We shear sheep, the church shears us," some banners said. "Churchmen—be sportsmen. Pay for your religion," others read.

Some in the parade were dressed in Cromwellian uniforms, many in rustic dress. Women in sunbonnets and aprons marched beside the men. After the procession many went to the House of Commons where they sought to interview their representatives on methods to halt payment of the land tax which takes \$11,000,000 annually from English agriculturists.

Originally, for the benefit of the crown, the farmers paid "the first fruits" and then one-tenth of each year's produce. The church passed the royalties to the crown for the benefit of poor curates.

Spread Bubonic Plague

Says Fleas Carry Germs By Hitch-Hiking On Rats

A story about fleas that spread the dread bubonic plague by hitch-hiking their way around the world on the furry hides of foot-loose rats was told at Vancouver by Dr. Karl W. Meyer, San Francisco, professor of bacteriology at the University of California Medical School.

So great is the risk of epidemic that efforts will be made to have a corps of Canadian government inspectors stationed along the international boundary line to study the migrations of rodents into the Dominion, and begin a rat and flea survey to find any existing evidence of "imported" infection.

Addressing the western branch of the American Public Health Association, Dr. Meyer showed with motion pictures the control methods used in California a few years ago when the fleas gave the plague a firm foothold on this continent. Subsequently they have transplanted the infection from California to Oregon, southern Washington, Idaho and Montana. Expressing fears that the fleas might reach British Columbia, Dr. J. W. McInloch, medical health officer at Vancouver, said federal authorities at Ottawa should immediately institute a protective service.

Received Major Share

Biggest Part Of Advertising Is Done In Newspapers

Newspapers received the major share of national advertising expenditures in 1935, the bureau of advertising of the American Newspaper Publishers' Association announced in its annual survey. The survey, based on a study of the advertising budgets of 387 companies, showed their combined expenditures of \$231,107,948 in the three principal mediums—newspapers, magazines and chain broadcasts—were apportioned as follows:

Newspapers—\$134,440,000, or 58.2 per cent.
Magazines—\$61,943,228 or 26.8 per cent.
Chain broadcast—\$34,724,720 or 15 per cent.

Twenty-two of the 33 trade groups listed in the survey favored newspapers over the other two mediums. After The First Year
The blushing bride entered the men's department of a big store. "I want a birthday present for my husband, but I don't know what to buy."

"Why not a nice silk muffler for evening wear?"
"Oh, dear, no! My husband never goes out at night."

"Well, you might get it for next year, madam. He will then."

One still being as good as another, when King Edward VIII, as the Prince of Wales, declined his signature to autograph hounds, he always explained good-naturedly that "my hand's too tired."

MOVE OVER, COMRADES
—Edman, in the Washington Post.

Facts About Wheat

Largest Wheat-Flour Exporting Countries Are Canada, U.S. And Australia

Canada's best market for wheat-flour is the British Isles; Australia's is the Far East. Wheat-flour exports from the United States are fairly well distributed throughout the world, but Japan's market for wheat-flour is confined to the Far East.

Production of wheat in India has often surpassed that of Canada, but India exports only a small proportion of her total output.

In 1928 the three largest wheat-flour exporting countries in the world were, in the order of their importance, the United States, Canada, and Australia. In 1935 this order was altered to Australia, Canada, and the United States, consequent on the 28 per cent. shrinkage of U.S. exports and the steady growth of Australian exports after 1930. Russia has been a most uncertain factor in the world cereal situation, suddenly appearing as a larger exporter of wheat, barley and oats in 1929, and again in 1931, and then relapsing into a position of minor importance.

Except for two years between 1928 and 1934, Canada was the leading supplier of wheat to the British market. In 1929 Argentina, and in 1931 Russia, were at the head of the list.

In 1935 Canada supplied 70 per cent. of the wheat-flour imported by the British Isles. Australia, Italy, and France increased their exports of wheat-flour to the British market, but those of the United States and Argentina have declined.

Now Streamlined Cooks

Ample negro cooks of the traditional mammy type are giving way to streamlined servants. The municipal bureau of Memphis, Tenn., noted this trend in an official report. It was explained that the more heroically proportioned women just can't fit so well into the miniature kitchens of many bungalows and apartments.

Must Guard Freedom

People Of Venezuela Went On Strike When Government Interfered

The people of Venezuela evidently value a free press. When the Government attempted a censorship, Caracas went on strike, students rioted, newspapers stopped printing, all public services were suspended, the police were killed and many injured. The demand was for restoration of free press and all civil rights. Within two days the Government yielded and conditions became normal.

The American people accept civil rights as if they were gifts from heaven, like water or air. Deprived of them, the majority would no doubt fight. We like to believe that, anyhow. The best insurance of a free press is constant vigilance and battle, by the press itself, when the right is menaced.—Editor and Publisher, New York.

One Explanation

U.S. Entomologist Gives Us Some Information About Monkeys

Monkeys have been much maligned. When they go over each other's fur in their cage, occasionally nipping something between their front teeth, they are not hunting for what you think they're hunting for. So says Dr. H. E. Ewing, entomologist of the U.S. National Museum.

But if that isn't what they're after, what are they hunting for? Dr. Ewing made some close observations and a few experiments, and one by one eliminated things that have been suggested: loose flakes of skin, salt crystals from perspiration, etc. In the end, it settled down to just hairs. When Jocko finds a loose (or perhaps just a loosening) hair on his mate's back, he plucks it out—and nibbles it up.—Science Service.

The first two omnibuses ever seen in England were introduced July 4, 1829. They were built to carry 22 persons, all inside, and each bus was drawn by three bay horses.

Take "Time Out" To Stitch These!

Household Arts By Alice Brooks

It's Fun to Embroider These

PATTERN 5549

Take "time out" to stitch these adorable pups, and you'll be well rewarded, for your family will be vying for their ownership long before pillow-top or picture is completed. Do these "doggy" likenesses in easy 8-to-the-inch cross-stitch—a child could do it—using floss in soft tans and greys, with a bit of black floss to emphasize the twinkle in those mischievous eyes!

In pattern 5549 you will find a transfer pattern of these dogs 12 x 12 1/2 inches; a color chart and key; material requirements; illustrations of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 313 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Canadian Commemorative Stamp Attracts Attention To Vastness Of Dominion

Dairy Industry Act Amendments

Important Changes Are Made In Regulations

The regulations under the Dairy Industry Act of Canada have been revised and renumbered, and the revised regulations are now in effect. The important changes are as follows:

Formerly packages containing butter were required to bear the registered number of the factory of origin unless the package contained plain butter put up under the brand or trade mark of a wholesaler or retail dealer who was not a manufacturer of butter. Under the new regulations, several methods of identification are legalized. Creamery or whey butter, cut as described in section 6, subsection (3) of the Act, if contained in a wrapper or carton, must bear on the wrapper or carton the name and address of the manufacturer, cutter, or jobber, or the name and address or the registered number of the creamery of origin, or the brand or trade mark of the wholesaler or retail dealer.

Other important changes in the regulations are in connection with standards for grades of butter. Provision is made whereby butter containing more than two per cent. of salt will be placed in second grade, unless the butter is destined for a purchaser who requests over two per cent. of salt. First grade certificates issued for butter containing more than two per cent. of salt must bear the following notation—"As butter for which this certificate is issued contains more than two per cent. salt and is represented as being for a trade requiring more than two per cent. salt, a first grade certificate has been issued. This certificate is not valid for sale of the butter for either export or domestic trade except to a purchaser requesting a salt content of more than two per cent."

Heretofore, the showing of dates of manufacture on packages containing butter has been optional for domestic trade but compulsory for export. Under the revised regulations, all packages containing butter submitted for grading must bear the date of the manufacture of the butter. Copies of the complete text of the regulations may be obtained upon application to the Dairy and Cold Storage Commissioner, Dominion Department of Agriculture, Ottawa.

Will Have Talkie Teachers

South African Schools To Be Provided With Films

Schools of South Africa are to have "talkie teachers" this year. Details of the plan are being completed by officials of the Union Education Department. Special positions are being created for the experts to carry out the new system. The films to be shown will not be for any specific subject; but will embrace the entire curriculum. They will be obtained from different countries. There will be films which have been graded for universities, films for high schools and those for primary schools. As soon as the project is working on a sound basis, it is understood, there is a distinct possibility that some of the films required for the schools will be produced in South Africa. Private enterprise is also expected to take a part in the making of the films in the Union.

More Humane Trap

Has Been Designed To Replace Vicious Steel-Jawed Type

A flat chain trap which will replace the vicious steel-jawed type has been invented by Vernon Bailey, veteran naturalist and employee of the U.S. Biological Survey.

The trap has been designed in three sizes and will catch anything from a barn owl to a grizzly bear without hurting its prey, according to Bailey. To support his claims before an audience, Bailey placed his finger in the trap.

Celebrated Two Birthdays

A royal salute of 21 guns boomed from the citadel at Halifax on King Edward's 42nd birthday as citizens celebrated the royal holiday and the 15th anniversary of the founding of Halifax, at the same time.

Visitor—"What an innocent-looking face your little girl has."
Mother—"I hadn't noticed it. Dorothy what have you been doing."

Of all the postage stamps issued throughout the world since 1840, there is no single adhesive that is more interesting and more instructive than the special delivery designed by the Canadian government for the commemoration of the Confederation of 1867, says a writer in the New York World-Telegram. A complete set of stamps was issued in 1927, ranging in value from one cent to twelve cents, but it is the supplementary special delivery stamp that tells us so much about the country north of the United States.

The stamp as a whole represents the very spirit of Canada, for it embraces in its design five methods of transporting mail against a background of one of the greatest mountains in existence, viewed through a frame taken from a Gothic casement.

If we take the centre vignette and examine it carefully, we are faced with a visual demonstration of the country's vastness, for a land that employs these five distasteful methods of mail transportation must indeed be great. In the foreground we see a horseman, racing across the prairie, representing the post riders who still deliver mail to scattered residents. It is interesting to note that the words "Canadian Mail" may be discerned on the post bag of this horseman. It is the smallest bit of engraving ever attempted on a postage stamp.

Just in front of the horseman there are the rails of a steel train which is thundering a swift over. Beyond the rails may be seen a dog sled mauling through banks and drifts of snow. This is, in many parts of Canada, still the only way which letters and packages can be delivered and primitive though it may seem, it is practical and serviceable.

Further to the right is depicted ocean liners, for the coast of Canada is that her ports on both the Atlantic and Pacific are visited by liners from every foreign country in the world to bring and take away millions of dollars' worth of merchandise each year.

Scoring high above these other four methods of transportation is one of Canada's air-liners, for although she is so vast in territorial expanse, Canada has adopted every modern invention and her airways are closely linked with those of our own country.

The background for this pageant of mail expedition is gracious Mount Asinibon, the North American Mountbatten, one of the most impressive peaks in all America. The mountain itself stands about 45 miles southwest of Banff, in Kootenay National Park.

The delicate frame work which encases the entire vignette is taken from a window in the House of Parliament in Ottawa. For the Canadian people are conscious of the value of art. The words "Special" and "Extra" are evidence of the democracy of the Dominion, for, although under the English flag, the French inhabitants of the eastern provinces still retain their mother language; postage stamps and money are inscribed in their tongue for their convenience.

An Improved Speech

Lord Loughborough Had Nothing But Praise For Reporter

The complaint of the politician who finds his speech incorrectly reported by the press is generally long and bitter. Not so with Lord Loughborough.

Asked on one occasion whether he had really delivered a speech credited to him by a newspaper, Lord Loughborough replied: "Why, to be sure. There are many things in the report which I did say, and there are many more which I wish I had said."—Christian Science Monitor.

Score For Lady Drivers

A set of figures released at Cheyenne, Wyoming, recently was interpreted in various quarters as added evidence that the least that men the cradle also can safely guide an automobile. The Wyoming highway patrol reported that during the month of March women drivers figured in only 15 of the 125 automobile accidents in the state.

A gossip is one who talks to you about others; a bore is one who talks to you about himself, and a brilliant conversationalist is one who talks to you about yourself.

WORLD HAPPENINGS BRIEFLY TOLD

Soviet Russia's blond "parachute beauty," Nadejda Babushina, 20, died at Loshambay of injuries received in a jump.

An angry crowd of 3,000 stoned the automobile of Sir Oswald Mosely, leader of the British Fascist party, and smashed windows at the Fascist club at Hulme.

Even district court judges are not immune from court summonses. His Honor Judge Lucien Dubuc of Edmonton got one. He had failed to take out a license for his dog.

Robert A. Merritt, Jr., Winnipeg, was elected commander of the American Legion in Canada for the coming year, at the business session of a one-day convention in Windsor, Ont. University of Manitoba students may study the Norse language and literature in future years. Addition of this course to the curriculum in the faculty of arts and science has been announced.

Rev. Brother Henry of the congregation of Christian Brothers, who started his 50 years of teaching at St. Brigid's, Ottawa, in 1886, died in Montreal at the age of 68. He had taught in Toronto and Yorkton, Sask., during his career.

The board of railway commissioners published a judgment granting application of the Brandon, Saskatchewan and Hudson Bay Railway company for permission to abandon operation of its line from Morden, Man., to the international boundary.

Three Saskatchewan nurses and one each from Alberta and Manitoba are listed among those who passed the May examination for nurse registration in Ontario, as required by the department of health. Saskatchewan nurses are Frances M. Adams, Estevan; Mae Brunelle and Julia Corkey, LaFleche.

Consideration For Workers

General Foods Gives Annual Vacations With Pay To Hourly-Employees

Factory employees of General Foods in 31 plants in various parts of Canada and the United States, will enjoy from one to two weeks' vacations with pay this summer.

General Foods employees who have completed two years but less than five years of continuous service by July 1 of each year, and who have a record of regular attendance during the preceding calendar year, will get a week's vacation with pay during the current calendar year. Employees who have completed five years or more of continuous service will receive two weeks' vacation with pay.

The decision to reward General Foods' hourly-rated employees was made by the food company's plant managers. Announcement of the vacation plan was made by J. E. McIntosh, Vice-President, General Foods, Limited, Toronto.

"The purpose of this plan," Mr. McIntosh said, "is to provide annual vacations with pay for hourly-rated employees. It is a recognition of continuous service and regular attendance and of the value of a period of recreation from routine duties."

"Vacations with pay for factory employees is not an innovation in General Foods," Mr. McIntosh explained. "It has been the practice for many years in some units of the corporation to give vacations with pay on a limited basis. The newly announced program is a further step in a long established industrial relation policy of the corporation. It will liberalize the existing vacation plan and make vacations with pay available to all General Foods factory employees with two years of service."

Two years ago General Foods provided its employees with an old age retirement plan. A group insurance program, supported in part by the corporation, also is in force.

During the depression the corporation maintained a high average of employment, and since then General Foods has increased employment to what is now the highest in its history.

Qualified For Prize

Italian Farm Handed Down In Family For 918 Years

Giusseppe Pierantoni, descendant of a family which has lived on the same farm for 918 years, has been awarded a prize by the Italian government. Records show that in 1018, when barbarians were still overrunning the Italian peninsula, a peasant named Pierantoni reclaimed a plot of marshy land in Montebate, which has remained with and been cultivated by his family ever since. Last year the "Folletta Alta Terra" prize as it is known, went to Antonio Castellani, who, surrounded by his 19 children and grandchildren, was proved to be working the same land at Querciola, which his ancestors had worked for 709 years.

British Aviation

Huge Sums To Be Spent In Developing Air Craft

The greatest financial year in Britain's history of aviation is just starting. Between now and next April more than \$132,000,000 will be spent on aviation alone.

Work, for the right man, is to be had for the asking. There are not enough men to fill the positions vacant. Every pilot with the right licenses has a post, every workman with skilled experience is drawing overtime pay, every designer with ideas is busy at a drawing board.

The largest order for civil aircraft ever placed has been given for the new Imperial Airways machine—craft that will span the Atlantic, halve times on the empire lanes.

More than 2,000 men are at work in the Rochester works of Short Brothers, finishing the first batch of flying boats for this order. Another 3,000 are making the engines for them. Hundreds more are making the land planes for this order at Armstrong-Whitworths. The order amounts to \$10,000,000.

The government is spending \$90,000,000 on the Royal Air Force expansion scheme. Every aircraft factory in the country is working to maximum capacity on this order. No more orders are being taken.

Wider Markets

Says U.S. Policy Of Economic Isolation Will Never Bring Prosperity

What the United States needs is a complete readjustment of the economic policy we have pursued since the World War, wider markets for our own and our customers' goods, a wider field of endeavor for labor, a way found by which our foreign debtors can gradually liquidate their obligations to us. The policy of economic isolation if protracted for a million years could not in this time return work and prosperity to the people of the United States.

Under a policy of economic isolation, even if a man makes a profit more and more of that profit will have to be contributed to the government to provide subsistence for the unemployed. Under this policy we make it necessary for those who are working to support those who are not. The more trade we have the greater our prosperity and correspondingly less the tax burden. Less trade, less prosperity and higher taxes.—Senator Tydings of Maryland.

More Than A Coincidence

June Brides Did Not Choose Thirteenth For Ceremony

Superstition is gradually dying away but it looks as though there's a little of it yet, especially in connection with weddings. For instance, the Saturdays in June usually vie with one another to see which will have the most marriages to its credit. This year, however, a Saturday came on the so-called unlucky 13th, and whether it's coincidence or not, the Saturdays before and after have a bigger-than-ever list, while the 13th contents itself with less than half the normal number.

The brides of June 13, however, aren't a bit afraid of any bad luck. They all chose the day because it fits in best with their plans, although one admitted that she had rather a hard time convincing herself that the "13" didn't matter.—Toronto Telegram.

Has Large Interests

Over \$750,000,000 Of British Capital Invested In Shanghai

When one thinks of Britain in China, one thinks of Shanghai. It is estimated that something over \$750,000,000 represents the investment of British capital in Shanghai. "In spite of Japan's numerical predominance, the British community in Shanghai still contributes nearly twice as much as the Japanese towards the municipal taxation," according to The Round Table. What has been going on in Shanghai in recent years is typical of the changing conditions in the Far East. There has been a tremendous increase in the Japanese population in the international settlement and adjacent areas, till today the British are outnumbered nearly four to one. But the municipality has been developed by the British and its local council is controlled by them.—Hamilton Spectator.

King Edward has sent to the local corporation at Birmingham, England, on permanent loan, the silver trowel with which he, as Prince of Wales, laid the foundation stone of the Hall of Memory. 2158

The best of being a juggler is that you don't have to worry about getting caught in the rain with your hands full.—Stuttgarter Illustrierte.

Settle Child Actor's Case

End Dispute Over Custody And Earnings Of Freddie Bartholomew
Judge Harry Archibald has approved an agreement ending the family dispute over the custody and earnings of Freddie Bartholomew, child screen actor.

The agreement gave the custody of the 12-year-old star to his aunt, Mylicent Mary Bartholomew, who has piloted his screen career from its beginning.

The boy's parents, Cecil Llewellyn Bartholomew and Lillian May Bartholomew, were awarded the right to visit him as often as they cared to so long as this did not interfere with his movie work.

The Union Bank and Trust Company was named as guardian of Freddie's estate and his earnings—officially estimated at \$1,250 weekly—were ordered distributed as follows:

Ten per cent. to the father, five per cent. each to his minor sisters, Eileen and Hilda, and the remainder to his own estate.

From the estate the expenses of the boy actor and his aunt will be paid. The residue will go toward building a fund for his education and future needs.

Home Away From Home

Glasgow Prisons Are Made Comfortable For Favored Few

Prisons of Glasgow, Scotland, are to be just like a home away from home to a favored class of law breakers. The city will spend \$3,500 in making cells more comfortable with blankets, pillow slips, bolsters, rubber mattresses, collapsible tables and chair and other conveniences. Drunks will not be permitted to use them. Recently questions were raised in Parliament about the treatment of persons awaiting trial.

Less than 700,000 domestic servants in the United States live under the same roof with their employers.

Swagger Jacket "Takes You Places"

PATTERN 5653

A baby swagger, the smartest coat fashion of the season, is especially smart when done in crocheted. Work one for yourself, of string or yarn—its mainly in a simple stitch with plain crocheted for cuff and collar bands. Make yourself a plain crocheted skirt, pattern 5353, and you'll have a complete suit.

In pattern 5653 you will find complete instructions for making the swagger jacket shown in sizes 16-18 and 38-40; an illustration of it and of all the stitches needed; material requirements. Price of pattern 20.

In pattern 5353 you will find complete instructions for making the skirt shown in sizes 16-18 and 38-40; an illustration of it and of the stitches needed; material requirements. Price of pattern 20.

To obtain these patterns send 20 cents each (40 cents for both) in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 375 McDermott Ave. E., Winnipeg.

Sea Monsters

Each Season Brings Its Own Story Of Some Fearsome Sea Serpent

There must exist subterranean monsters of which we have no knowledge, for periodically reports from outlandish places reach us of fearsome creatures. The latest is a description from Papua of a sea-serpent with long, curled tusks like those of a boar. If the natives can capture one, the New South Wales government will give the public the greatest sensation of the year. Some men were sent to lasso a specimen which sported near the shore, but it escaped. It was about 15 feet long, greyish in color, with a snake-like head, huge mouth, and pale stripes under the jaw. The same creature rose out of the water and poised itself to attack two fishermen, who frightened it away with shots, but not before they had noticed its vast round eyes and head.

Mineral And Vitamins

Doctor Lists Things Every Child Should Eat Daily

What every child should eat daily to preserve the body's supply of minerals and vitamins was listed by Dr. F. F. Tisdall, of Toronto, at the Canadian Medical Association convention held in Victoria.

Dr. Tisdall specified from 25 to 30 ounces of milk, including milk used in cooking, which should be about one third of the total; eggs and meat in reasonable quantities; at least two vegetables besides potatoes, and some fruit or raw vegetable.

If the human body was getting enough mineral and vitamins, more would do no good.

Not only does a bat have exceptional powers of sight at night, but fairly good vision in daylight.

People of England paid more than \$35,000,000 last year for clothing made in other countries.

SUNDAY SCHOOL LESSON

JULY 12

WITNESSING UNDER PERSECUTION

Golden text: We must obey God rather than men. Acts 5:29.

Lesson: Acts 3:1-4:31; 1. Corinthians 13:1-25. Devotional reading: Romans 10:8-15.

Explanations And Comments
Peter's Cure of a Beggar's Lameness, Acts 3:1-10.

Peter Ascribes the Cure to Christ, Acts 3:11-16. An amazed crowd quickly gathered in Solomon's Porch, and Peter hastened to tell them that it was not by his own power that he had wrought this marvel, but through faith in the Prince of life the man had been made strong. This first act of healing of the apostolic age reminds us of the fact that triumphs of modern surgery and medicine being wrought to-day by medical missionaries in the hospitals of eastern lands seem to be as miraculous as the picture of this restored cripple, leaping about to try the new strength in his limbs.

Peter and John Arrested, Acts 3:17 to 4:4. Peter's preaching at this time raised so many believers for Christ that the number increased to five thousand in all. The priests, the captain of the temple, and the Sadducees came and arrested Peter and John because they proclaimed in Jesus the resurrection from the dead. It being evening and too late for a trial, they put the apostles in prison for the night.

Peter's Boldness Before the Sanhedrin, Acts 4:5-12. The next day the Sanhedrin sat in session, that great Jewish tribunal before which Jesus had been tried and pronounced guilty. It was supreme in all matters affecting the Jewish law, the sentence of death being the only penalty which they might not inflict. And now Alexander and other great officials were present. Through his sons and sons-in-law Ananias and Caiaphas, who high priest in Jerusalem for fifty years, though Caiaphas was the official high priest recognized as such by Rome. The members sat in a semi-circle and before them stood the prisoners, Peter and John, and the healed man also, as a kind of accessory to the deed.

By what power or in what name have ye done this? they questioned the prisoners.

Peter, now filled with the Holy Spirit, answered his enemies. "Ye rulers of the people (the chief priests) and elders (representatives of the Sanhedrin) we this day are examined (put on defense) concerning a good deed done to an impotent man, who is now whole. By what means this man is made whole if (we are forced like criminals to defend ourself) by our own power or by the power of any other god?"

"In our hearts we have salvation for all, that is in the name of Jesus Christ of Nazareth, whom ye crucified, even he whom God raised from the dead, whom in him doth this man stand before you whole." Thus boldly Peter accused them of having crucified Christ. "He is the stone which was set up by you the builders, which was made the head of the corner," that is, the stone at the top of the wall, which supports and unites them. See Ps. 118:22 and Matthew 22:42-44.

"In our hearts we have salvation for all, that is in the name of Jesus Christ of Nazareth, whom ye crucified, even he whom God raised from the dead, whom in him doth this man stand before you whole." Thus boldly Peter accused them of having crucified Christ.

"He is the stone which was set up by you the builders, which was made the head of the corner," that is, the stone at the top of the wall, which supports and unites them. See Ps. 118:22 and Matthew 22:42-44.

"In our hearts we have salvation for all, that is in the name of Jesus Christ of Nazareth, whom ye crucified, even he whom God raised from the dead, whom in him doth this man stand before you whole." Thus boldly Peter accused them of having crucified Christ.

Thousands Watch Air Display
Britain's New Fighting Planes Go Through Intricate Manoeuvres

One hundred and fifty thousand persons, including representatives of 47 foreign powers, attended the annual display of the British Royal Air Force at Hendon, London, today.

The huge crowd watched Britain's new fighting planes roaring over the field at a speed of 300 miles an hour and participating in intricate flight manoeuvres.

One of the features of the display was a training demonstration during which two flyers took to the air and all instructions from the "teacher" to his "pupil" were relayed to the crowd by radio and loud speakers stationed on the ground.

Hospital At Akilavik

New 24-Bed All Saints' Hospital To Be Opened This Autumn

When the new 24-bed All Saints' hospital is opened at Akilavik, diocese of the Arctic, this autumn, Miss Margaret Field, Chilliwack, B.C., will be added to the staff. It was announced in Toronto. The building will replace that destroyed by fire April 6.

Miss Field will accompany Margaret A. Solomon, nurse-in-charge of the hospital, and Marion Harvey, house warden, when they journey to Akilavik by the last boat down the Mackenzie river in August.

Miss Solomon has been in New Westminster, B.C., since the fire, and Miss Harvey in Toronto.

"I suppose when we have been flying for a year or so it becomes second nature?"

"Surest thing you know. Why, I'm getting so that I often feel a craving for worms and bird seed."

Employment In Canada

Upward Trend Is Indicated In Returns Made By Firms

Employment in Canada, as indicated by returns of statistics furnished by 6,800 firms, showed a gain of 23,295 persons on June 1 as compared with May 1, the bureau reported. In comparison with June, 1935, an increase of 47,721 was shown in the number employed.

This advance is larger than the gain recorded during the month of May last year, was smaller than the average seasonal gain in the period from 1920 to the present.

The report showed 943,513 on the payrolls of the co-operating firms. Compared with 940,218 at the beginning of May and 915,792 on June 1, 1933, the index of employment on June 1 stood at 102.0 compared with 99.5 in the preceding month and 97.6 on June 1, 1935. The index is based on the year 1926 as 100 and at 102.0 stood at the highest figure for June 1 since 1931.

Improvement was reported in manufacturing, particularly in the food and lumber divisions. In the non-manufacturing industries, there were important increases in logging, mining, communications, transportation, highway and railway construction and maintenance, services and construction was not so active.

The trend was favorable in four of the five economic areas. Firms in the prairie provinces employed the greatest number of extra workers.

Construction (especially railroad construction) and maintenance, transportation, manufacturing and trade showed improvement in the prairie provinces.

Stand By The League

General Smuts Enunciates The Position Of South Africa

General Jan Smuts, minister of justice in the Union of South Africa, said in a recent speech that it would be "sheer lunacy" for South Africa to quarrel with Great Britain.

He said the union would stand by the League of Nations until the very end, agreeing with the views on the league expressed by Prime Minister J. B. M. Hertzog.

(South Africa has expressed her opposition to dropping sanctions against Italy for the Ethiopian conflict.)

"It would be sheer lunacy to quarrel with England," General Smuts said in a recent speech, told an Afrikaner day meeting. "We do not possess a single ship able to ward off anti-aircraft carriers which could land enough planes on our shores to wipe out our large cities within a few days."

"I am not referring to an imaginary danger but to a very real one. It is said we will be simply dragged into the next war in which England is involved but let me tell you that England knows South Africa wants to keep out of war, and also knows that South Africa has the right to decide her own course of action and the union will not declare war unless the people of South Africa through their own parliament have decided on that question."

Gen. Smuts said that South Africa constituted "an attractive bait for avaricious nations." He declared there was no doubt her position was becoming more dangerous.

Indian Boys Build Boat

Work At Sardis, B.C., Was Done In Four Months

The boys at the Colquhoun Industrial School, Sardis, B.C., under the direction of Mr. R. Huddleston, have completed the building and delivery of a very fine boat. The boys, between the ages of fourteen and seventeen, have done the work in four months. Thirty-five feet long, with an eight-foot beam, it will be equipped with a hundred horse-power motor. It has nice lines and a light draught. The planking is of British Columbia red cedar, the keel is of fir, ribs of oak, while half a ton of Australian gum wood has been used. As these boys come from families engaged in boat-building and fishing, the training they get at the school is of practical importance. A rowboat is now under construction, and part of the instruction deals with gas-engine construction and repairs. While the Indian boys are thus employed, the girls are making, and the products of the arts and crafts department demonstrate.

"Shorty", a mongrel dog, earns \$35 daily for his master by playing "fox" parts in training pictures. Real trained foxes earn only a thirty shilling much.

A contemporary defines an amateur gardener as one who makes his beds and then lies about them.

"My Mistake was Using Cheap Mustard!"

I never knew there was so much difference in mustard! I thought I was economizing when I got more of the cheap mustard for my money!

"I've learned my lesson! It doesn't pay to waste good material by buying a substitute for Pure Mustard. I'll stick to KEEN'S D.S.F. MUSTARD."

Made from seeds grown in the Fens of England, shell or hulls are removed and only the inner part of the seed is used. Superb blending ensures the full mustard flavour.

In original tins for as little as 10¢

KEEN'S D.S.F. Mustard

FLEMING'S FOLLY

— BY —
LAWRENCE A. KEATING

CHAPTER XIX—Continued

His bullet ripped the weapon from the other's hand. With a hoarse cry Roper tried frantically to regain it. His elbow was that of a maddened animal as nerves sprayed pain over his arm and shoulder. Suddenly he abandoned the gun, stooped, snatched a fresh Colt from the holster. He had not touched, and, gripping it, ran closer.

Link waited. A bullet had torn a hole in his trouser leg and perhaps had struck him, but he was conscious of throbbing pain from his side and shoulder. As the rancher fired again, Link fired. His accuracy repeated, once more Roper Kilgo was disarmed!

The crowd uttered a long-drawn gasp, for still the man came on with heightening volubility. The thirty feet that had separated him and Fleming now was entirely gone; Kilgo's thick frame hurtled through the air and his claw-like stubby hands shot for Link's wrist and throat.

They crashed, a swirling mass of writhing humanity. A cloud of dust rose so that spectators could not distinguish one from the other. Link's forty-five exploded. A well-placed blunt fist made it either away in the dust. His antagonist whipped up a knee that grazed his groin. At the same time Roper abandoned his wrist hold and locked terrible visible fingers on Link's chest.

His eyes started from their sockets. His head went foggy and the world receded, then seemed to blot out a ringing set up in his ears and every muscle went watery weak.

Hastily before his vision came again the bulldog jaw of Roper Kilgo. And with a supreme mobilization of strength in what he knew was his final blow, Fleming whipped his right arm back, crooking the elbow, then shot forth a terrific slam to the chin.

The fierce, bestial countenance before him sagged away. Dully Fleming heard knuckles meeting jawbone, felt that awful grip on his windpipe relax, felt back-knocked fingernails scratching over his flesh. He crumpled to the ground as he slid into the yawning gulf of unconsciousness.

When again he opened his eyes they were stinging and heavy. The first face he made out was that of Helen Hamilton, and he knew she leaned over him, held his head out of the dust with a slender arm about his neck. Gratefully he gulped from

a flat bottle she held to his lips, then sank back sighing.

There was a movement in the circle of bystanders and Sheriff Ames Stephen's grim face appeared. The lawman knelt. "Yuh gonna be all right?" Say, Link, I got news for yuh! Goshamighty, can yuh stand a terrible shock?"

Raw whiskey was bringing his senses again under control and he stirred as if to rise. "The money!" he croaked. "Pay—Kilgo! Pieper—"

"Yes! It's been done, Link! Otto brought the cash and I paid him. Oh, my dear!" Helen whispered, searching his want countenance. "You—yuh'll be all right?"

He managed to nod. "Buz?" he asked weakly. "The agreement?"

"It's all arranged, Link. Buz—"

She halted, and the long silken lashes fluttered down. Her Stetson, saucily awry, poised a mass of tumbling hair that slowly descended downward over the girl's shoulder. "Buz—got hurt. Roper tried to kill you, and—"

"Buz interfered," came the vibrant voice of Waco Byrne. "He's in a bad way, Link." He glanced at the girl, who had drawn back and was staring dazedly at the ground. "In fact, Buz got it. He's dead. But the kid did one heroic thing in his life anyhow. Got rest his soul!" Byrne whispered fervently. "He saved your life, son!"

There was a taut silence. As if remembering the news he brought, Sheriff Stephen bent again over Link. "Listen!" he commanded excitedly. "Yuh dam! Fleming's Folly! She goit!"

Link sat up with such suddenness that his forehead brushed the lawman's shoulder. "What?"

In a flash he was on his feet. His shoulder, he noticed, was tightly bandaged. "What you say?" he cried in a voice that cracked to weird falsetto notes. "What's you say about the dam?"

"Hey!" bawled the sheriff. "Bring a boss! Come on, Helen: we got to like like hell workin'! It's workin'! I tell yuh! That damned dam's a-flooded an' workin', Link!"

Half an hour later, in the van of two score wildly shouting riders, Helen Hamilton, with her hair flying in the breeze, with her small booted feet firmly braced against the dashboard, urged speeding blacks to a wilder, faster pace. The Triple H spring buggy rattled and careened on two wheels. Thrumming hoofs were like the staccato battle of a small boy's stick on the pickets of a fence. On all sides of them swarmed excited citizens of Rawhide, ranchers and ranch hands of western Boone County. A wide-eyed, breathless procession of men with a tonishment on his face, every quiver lurching the steed under him.

Fleming had one good hand with which to cling to the iron brace beside his seat. With glowing eyes he stared admiration for the girl beside him, driving like some reckless expert charioteer of Roman days—if there were women charioteers! Now and again his look turned from his eyes squinted hard and hopeful at the whiteness of Silver Creek Dam as it flashed rapidly closer.

On a billy eminence he ventured to touch her smooth bronzed forehead. Helen glanced over, braced her feet harder, and slowly, deftly, drew the panting blacks to a halt. The horseback lady so markedly as a steer split around a post, swerved right, and headed for the up-trail to McLenora's headquarters shack. But for the man and girl, was sufficient view of what they wanted to see.

A long moment they sat drinking in the scene. Far below them, in the smooth, vast hollow shaped like a half oyster shell, moving water gleamed in irrigation ditches that sprayed fan-like over twenty-six hundred acres. Rapidly, eagerly, glinting triumph in the sun, the precious moisture of Silver Creek rippled and eddied in busy currents through the veins of that fan, filling ditches, moistening for the first time the wasteland that no one would own. No one save Link Fleming and Helen Hamilton.

They did not speak for a full three minutes. Their eyes bright, they gazed in the awful beauty and significance of this thing they had brought to pass. At last the girl uttered a long sigh and relaxed in her seat. The spell of his fascination disturbed, Fleming turned for a look, and their eyes met.

"Fleming's Folly!" she whispered huskily. "Fleming's—Folly!"

He swallowed hard. There was an obdurate lump in his throat. Then Link reached out and wound her reins about the whip in its socket. He took her small shapely hands in his larger browned ones.

But there came interruption. A wild-eyed very little man with Stetson gone and thin hair tossing atop

his shiny head, raced up on a diminutive mustang. He leaped hard on the reins and all but hurtled from his perch as the animal skidded on lowering haunches. He cupped his hands to them.

"Link! By Gawd, it works! Say, I'll give you a hundred an acre, spot cash! One hundred bucks, you an' Helen. Eh? We'll sign up right here!"

Fleming looked at her. They smiled. "Reckon not, Otto," he called back to the banker who was jerking his head from them to the fascination of the valley below, and back again. "But we'll keep our promise about the fifty acres for you."

"Hundred and twenty-five dollars, then? Hundred an' thirty-five? I'll buy it all! Eh? No? Look here, Link! I backed you, didn't I? Believed in this thing, didn't I? Gave a hundred an' fifty an acre for any amount!" the Rawhide banker cried in desperation.

"Otto, I'll give you a tannin' if you don't turn that moth-eaten plug and money out of sight— pronto! Can't you see," Link complained, as he maneuvered to circle Helen Hamilton's shoulders with his good right arm, "Can't you see I'm busy making love?"

"What? You—"

Slowly he thrust away the check-book he had produced. A disgusted expression crossed his face. Otto Pieper took up his reins, clucked to his mount, and started reluctantly away.

Fifty yards distant he succumbed to a violent urge to glance around. But the banker jerked quickly forward again, his lips screwed in the oval of one kissing. A soft, reflective gleam entered his shrewd grey eyes. Pieper grinned and shrugged his shoulders.

"Fleming's Folly. Huh!"

The End.

State Pension Plan

"Big Family" Law Has Been Introduced in Soviet Russia

All families in the Soviet Union with more than six children, the youngest of which is under five, begin immediately to receive state pensions. A "big family" law to this effect was promulgated recently.

Divorced persons will have to pay up to 50 per cent. of their incomes for the support of their children, and divorce will be made more difficult by heavy taxation.

Many fathers, it was announced, who for years have refused to support their children, began making payments, fearing the punishment of two years' imprisonment provided for delinquents of this obligation.

The government will pay 2,000 rubles a year for five years after the birth of the seventh child, and give similar aid at the birth of each succeeding child, including the 10th. After the 10th, 5,000 rubles will be paid for each new baby. An example of the severity with which offenders against the welfare of children are punished was seen in a sentence passed at Kiev. Three former officials of the Ukrainian Council of Labor unions were sentenced to death for embezzling funds assigned for rest homes and the care of tubercular children.

Just in Dad's Work

Firemen at Windsor have responded to some strange calls but none stranger than one received by telephone from Detroit. A Windsor woman had gone to the Michigan city for the day and left the hot water heater turned on in her Windsor home. She asked the firemen to please go and turn it off or there might be a fire. They went.

It took 76 years to build the Great Pyramid of Egypt.

"Do you think that can be the Maginot line?" (The Maginot line is France's famous defence barricade along the borders of Germany).—Marianne, Paris.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile isn't flowing freely, your food doesn't digest. It just decays in the bowels, and when it poisons you into the body, and you feel sour, sick, and tired.

A more logical movement down "always get out of bed" is to get up early in the morning on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Bile is the key to your health. Make the bile flow freely. They do the work of nature but have no poison or mercury in them. Ask for Carter's Little Liver Pills by name! Habitually refuse anything else. See.

Mysteries Easily Explained

Easter Island Is No Riddle To French Ethnologist

The three "great" mysteries of Easter Island are no riddle to Dr. Alfred Métraux, French ethnologist, who has joined the staff of the Bishop museum in Honolulu.

Although Métraux first went to Easter Island as a representative of the Paris Museum of Ethnology, he transferred his services to the Honolulu museum because of his conviction that only long residence in the Pacific would make it possible to solve the problems of the origin of the Polynesians and various tribes of the Pacific.

As regards the colossal statues on the seashore at Easter Island, Dr. Métraux declares there should be no mystery whatsoever. The statues, he points out, weigh only five or six tons.

He insists they could have been carved in the inland quarries from which the stone originated and dragged to their present position by natives. Four hundred men could drag them with ropes of native weaving, he says.

The second "mystery" which he has defined is that the inhabitants of Easter Island are descendants of the population of a lost continent. He identifies them as being merely related to the Maori of New Zealand and calculates they came to the island in the 17th century.

Finally, the third "mystery" of script on wooden tablets found on the island is explained by Dr. Métraux who insists that it is not a true written language but rather a device to aid the memory of the natives in reciting sacred legends.

No Longer A Theory

Existence Of Spin Of Light Has Been Proved

The "spin" of light, that is, the twisting force of which its rays exert on anything solid, a scientist felt never done before, is announced by Dr. Richard A. Beth of the Worcester Polytechnic Institute, Massachusetts. The spin of light, or its angular momentum, means that each particle, or photon, of light is capable of spinning like a speeding rifle bullet. This spin had been only theory until Dr. Beth found a method of proving its existence and measuring it by training a beam of light on a circular quartz plate one inch in diameter and about three thousandths of an inch thick.

Showed Poor Judgment

A squirrel that attempted to steal eggs from a robin's nest in St. George's Park, Guelph, Ont., showed extremely poor judgment. Three robins chased him down the tree, up and through the branches of a second one and to the ground again, then up a telephone pole and out along a cable. The birds abandoned the attack.

Grocer—"Well, little man, what can I do for you?"

Little Man—"Mother sent me to get change for a five dollar bill, and said she would give you the five dollars tomorrow."

Anxious To Secure Organ

Brantford Historical Society Wants Instrument Now In Montreal

An antique barrel organ, more than 150 years old, sought by the Brantford Historical Society, has been discovered in the Indian room of the Chateau de Ramezay in Montreal.

Brantford historians are anxious to secure the organ for their museum because it was presented by King George III. to Chief Tayendanga, of the Six Nations, who became known as Joseph Brant, after whom the city of Brantford has been named. So anxious are they to gain possession of the music box that they have offered to even purchase it outright.

This is hardly possible, because the Chateau de Ramezay is not an antique shop where objects can be loaned or purchased, instead it is a haven for historical objects. The Brantford parties will have to address their pleas to the Antiquarian and Numismatic Society of Montreal, and according to past records they are not considered generous in the habit of letting a valuable museum piece slip out of their hands.

The organ stands about two feet high and resembles more a modern hunter or an electric ironer than a musical instrument. It is well preserved in spite of its age and while it has not rendered melodious tunes for more than a century, by pumping the bellows by hand, instead of using the handcrank, it is still possible to hear tunes, but these sound like the whistles of a locomotive.

The name of the maker is completely erased, and on the cover-board are the titles of 32 tunes and hymns, the last of which have not been heard since the 17th century.

Museum records show that the organ was presented to Chief Tayendanga or Joseph Brant by King George III, during his reign of 1760-1820. The reason for the presentation is unknown, but it is a known fact that the celebrated chief of the Six Mohawk Nations was highly educated and visited England on several occasions. He died in 1807 at the age of 60. There is a statue of him at Brantford.

The World's Progress

Has The Same Rate Of Advance Been Made In Every Field Of Endeavour

Whether the same rate of growth has been registered by the English-speaking peoples in every field of human endeavor between the Britannia and the Queen Mary is a question that needs further study. For example, a few months before the Britannia sailed from England there was published in that country a book called "Nicholas Nickleby." The year after the Britannia arrived here a first volume of essays was published by a man named Emerson. Obviously we must have better statistics than are now available before we can affirm that the two English-speaking nations today can easily turn out a couple of books from five to three hundred times as good—New York Times.

Likes His Adopted Country

Native Of Holy Land Prefers Canada To Palestine

Louis Kasasad prefers northern Victoria county even with its bleak, cold winters to his sunny native land of Palestine, he told newspapermen at North Sydney, Nova Scotia, when he returned from a visit to the Holy Land, his first in 40 years.

During his trip he visited many of the Biblical cities, saw relatives he had not seen since childhood and witnessed the first of the Arab-Jewish clashes. Joy at Canada, he expressed his joy at returning to his adopted country.

Claims Many Victims

Diseases of the heart were responsible for 231 deaths in Saskatchewan during the last three months of 1935, according to the Dominion bureau of statistics. Cancer was the next most serious disease, claiming 148 lives, while pneumonia was third, causing 126 deaths.

She: "Oh, John, you are so extravagant."

He: "The dinner check was only \$1.00."

She: "But you gave the waiter 20 cents! I saw you."

The Tunguses of Siberia have no general name for the reindeer, although they have specific names for "tame reindeer," "wild reindeer," "young reindeer," etc.

Sweden is adding \$2,000,000 to its defense costs.

Little Helps For This Week

Behold I have refined thee, but not with silver, I have chosen thee in the furnace of affliction. Isaiah 48:10.

Be patient suffering soul; I hear they cry.

The trial fire may glow, but I am high.

Until My image shall upon it shine.

Fear not for I am near, thy help to be;

Greater than all thy pain, My love for thee.

God takes a thousand times more pains with us than an artist with his picture, by many touches of sorrow, and by many colors of circumstance, to bring man into the form which is the highest and noblest in His sight. If only we receive His gifts and myrror in the right spirit. But when this cup is put away, and these feelings are stifled or unheeded, a greater injury is done to the soul than can ever be amended. What we should receive for our soul's good we may suffer to pass by and nothing comes of it. Then we come to the Lord and complain, and He tells us to open our heart to the pain which will do us more good than if we were always in the spirit of praise.

A Distinguished Veteran

Sir Percival Marling's Worst Moment Was Not On Battlefield

The late Sir Percival Marling, V.C., was one of three survivors who won that decoration in the first Sudan campaign. He also took part in the first Boer War, and only three years before his death, revisited the scenes of his youthful battles in the Sudan as a young lieutenant. Amongst the famous warriors he encountered was Osman Digna, who was reputed a genuine centenarian when he died ten years ago after many false alarms. Five years ago Sir Percival published a most interesting book of recollections. From this it may be gathered that his worst moment was not on any stricken battlefield, but on a ceremonial occasion in the heart of London. He was the officer in charge of a mounted escort for Queen Victoria, and from his charger's mouth fell on the Queen's veil, necessitating mopping with energetic handkerchiefs by the Princess of Wales, afterwards Queen Alexandra, and the Ladies-in-Waiting. This controversy brought about the Queen from the Queen and a peremptory order from the Horse Guards against officers' horses foaming at the mouth.

Serious Surgical Ailment

Winnipeg Doctor Urges An Early Diagnosis Of Appendicitis

The need for early diagnosis of acute appendicitis was stressed by Dr. Gordon Fahrl, Winnipeg, speaking before the Canadian Medical Association. It was in the early stages that operation offered the lowest mortality rate.

In the United States and Canada, 25,000 deaths were reported annually from acute appendicitis, equivalent to 20 per 100,000 of population. Appendicitis now ranked only second to cancer as a killing surgical ailment, he said.

Exclusive of the cost of the surgery itself, it costs Uncle Sam only \$4.50 to turn out 1,000 dimes, \$7 for 1,000 half dollars and \$10.50 for 1,000 silver dollars.

Crossfield and District Echoes

Miss Isabel Leask was a Calgary visitor Tuesday.

Loretta Fike left Wednesday to spend a holiday at Nordegg

George Zang, of Calgary, was a weekend visitor in town.

Mrs D. W. Carmichael returned home last Friday from Calgary.

Glenn Williams was in town Saturday enroute to Calgary.

Mrs. J. Bate and Miss B. Bate of St. Catharines Ontario are visitors at the Dougan Ranch

Mr. and Mrs. Melvin Patmore and children spent the weekend at Sylvan Lake.

Adeline Carmichael and Arlene Amery are members of the C.G. I.T. Camp at Sylvan Lake.

Miss Norma Miller of Olds, is spending a few days of her holidays at the Leask farm, Madden.

Kenneth Miller of Olds is the new Farm Manager at the W. D. McCool farm.

Mrs J. R. Gilchrist and daughters Jean, Gladys, and Lois are visiting Ray, and Kenneth Gilchrist for a few days.

Dr. S. H. McClelland is in Edmonton, at the Exhibition, with an exhibit of the McClelland Veterinary Supply Company.

Margaret Cameron, Anne Cameron and Edith Griffiths won first prize in the comic section at the Carstairs Stampede Parade.

Adam Cruickshank, Ed Meyers, Fred Baker and Frank Brown are spending a fishing vacation together in the mountains.

Rev. Morley Hall of the Westbourne Baptist Church, Calgary, was the guest preacher at the Crossfield Baptist Church Sunday

Mr. and Mrs. Wood, who have been visiting Mr. and Mrs. W. J. Wood of town, left for their home in Saskatchewan last Saturday.

Mr. and Mrs. Miles Fike, Mrs. Haddon and Mr. and Mrs. Arnold High attended the fireworks display at Calgary Saturday night.

Dog Pound Annual Stampede and Sports Day will be held July 22nd (Wednesday). Go West on that date Folks Go West.

Mr. and Mrs. W. H. Miller of Olds, and Mr. and Mrs. C. Miller of L'Esperance, Washington, were Sunday visitors at the home of Mr. and Mrs. G. Leask, Madden.

C. H. McMillan, Clarke McMillan and G. Y. McLean spent Friday in the Olds district. While in need of rain that district is in better shape than Crossfield.

Mr. and Mrs. Charles Fox and Mr. and Mrs. H. Ballam returned last week from a glorious holiday spent in the States and Pacific Coast.

Mr. and Mrs. F. Mossop, Miss Elsie Mossop and Mr. and Mrs. Earle Devins and family left to spend a holiday at Sylvan Lake on Saturday.

Mrs. D. H. McPadyen is again at the old stand helping out in the Post Office the first two days of the week while the Postmaster basks in the sunlight at Sylvan.

E. Carter, of Ponoka has arrived so take over the Tellers Post at the local Bank. James Dickson leaves for Calgary this week to take up service with the 8th Avenue West Branch of the Bank.

Residents of the district remember, if you are in need of legal services, that Mr. E. C. Collier is here every Saturday and will be pleased to talk over matters with you at the Tredaway Office, Main Street.

Your friends are always interested in your doings. Let us have your items of interest. Maybe you have friends visiting you, or maybe you have been away, this information is appreciated. Send it in. There is, of course, no charge

Miss Isabel Goldie is attending Summer School at Edmonton.

Mr. and Mrs. T. M. Mair are Vancouver visitors this week.

Mr. and Mrs. T. G. Sefton and daughter, Irene, are holidaying at the Pacific Coast.

Mrs. J. Hatton and family of Drumheller visited at the Miles Fike home last week.

Mr. C. Sine of Calgary Alberta, is assisting Mr. H. Fitzpatrick at the local Atlas yards.

Roy Noble of Olds Alberta, former Bank of Commerce man, renewed old acquaintances here last Monday.

Mrs. Urquhart, who has been staying with Mrs. Fred Stevens, returned to her home at the ranch, on Monday last.

Mr. and Mrs. Anderson of Rumbey Alberta, and family, visited with Mr. and Mrs. H. A. Bannister last week.

George Leask, Jr. of Madden got into the finals of the Canadian Calf Roping Contest at the Calgary Stampede. George was well up in averages but just missed entering the prize money.

Don't forget the big Dance at East Community Hall Friday July 17th. Sponsored by the 2 Softball Teams a good time is assured. Borbridge Orchestra in attendance.

VILLAGE OF CROSSFIELD
NOTICE

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Village of Crossfield will offer for sale by public Auction, on Tuesday, August 11th, 1936, at the hour of 2:30 o'clock in the afternoon, at the office of the Secretary-Treasurer, Crossfield, Alberta, the following lands:

LOTS	BLOCK	PLAN
19 and 20	4	45011
1	6	45041

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificate of title. Terms, cash.

Redemption may be effected by payment of all arrears and costs at any time prior to the sale. Dated at Crossfield, Alberta, this 4th day of July, 1936.

Societies Etc.

WOMENS GUILD

Hello there folks! Call Crossfield and District. The W.G. are holding a Garden Party soon, at the home of Mrs. R. Arnott. Watch these columns for further particulars. Don't miss this outstanding event.

NATIVE SONS & DAUGHTERS

The Native Sons and Daughters will hold their Annual Picnic at Bowness Park this year on Wednesday July 29th. Everyone is cordially invited to attend and make a day of it.

Committees in charge are: L. E. Lennon, Lunch; A. Stevens, Sports; E. W. Gordon, Transportation.

All arrangements will be announced and fully explained in these columns next week - look for them. Country Representatives please note.

Letters to the Editor

As an act of courtesy "Letters to the Editor" are published, but the Chronicle cannot be held responsible for the opinions expressed Editor,

The Chronicle.

Will you kindly permit me space in your valued paper for a few words concerning the recently formed Senior Baseball Club. In the absence of any comment by the Chronicle on the action of the local young men in forming a baseball club an explanation at this time will not be amiss. Specifically the case is this: the days of imported players are past; the local boys who want to play ball and who can play ball are being given their chance. With about 20 potential ball players in Crossfield and immediate district there is no need to import players (there never was, really) and what is more important, no desire on the part of the fans to see these imported players perform.

We have made no solicitations for funds and hope to provide, before the end of the season, a brand of baseball that will supply its own source of revenue, namely good clean games, drawing enthusiastic crowds and resulting in whole hearted support.

All those interested are earnestly invited to attend practices and warned that would-be "big shots" are out. Money in the treasury will be used to purchase equipment and provide transportation, etc. It's an effort to give local boys a chance to show what they can do and on behalf of this effort, I bespeak the support of true sport-loving fans.
